

A9X

Cyber Detective

A software based cyber security platform that reports if PCs are secure, performing normally, and up-to-date. Makes your I.T. Team's job easier.

IMO MSC.428 (98) COMPLIANCE

Software only solution to assist you with IMO compliance by reporting potential cyber security risks.

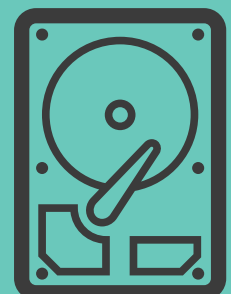

HARDWARE, OS AND SOFTWARE AUDITING

Detailed audits of hardware (motherboard, BIOS, hard disks, memory etc.), operating system and software installed.

HARDWARE FAILURE PREDICTION

Monitor memory and hard disks diagnostic data and report faults and predicted failures. Alerts you to critical failures before they happen.

PERFORMANCE MONITORING

Monitor PC performance (CPU, Usage, Memory Usage and Disk IO). Help detect slow PCs and unusual behavior caused by misbehaving applications or malware.

LOCAL AND GROUP POLICY ANALYSIS

Compares security configuration of common settings with recommended best practices. Extensive analysis of Local and Group Policy according to NIST and government guidelines.

VULNERABILITY DISCOVERY

Discover and report vulnerabilities in both the operating system version and the software applications installed.

NETWORK MONITORING

Detect all network devices across multiple subnets, highlighting rogue, unknown devices. Detailed, interactive visual network diagrams generated in real-time.
