Scripting

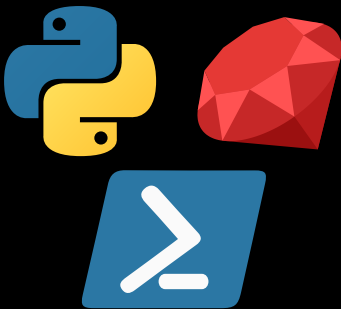

Save time and money by automating common I.T tasks whilst making your I.T Team's job easier.

## MAKES ADMINISTRATION AND SUPPORT EASIER

Perform regular I.T tasks without struggling with troublesome and sluggish remote desktop sessions.

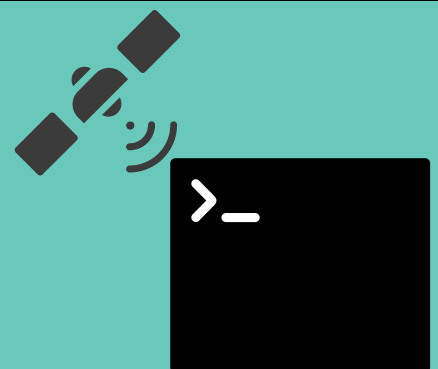

## MULTIPLE LANGUAGE SUPPORT

Create scripts and run commands in 3 different and popular languages: PowerShell, Ruby or Python.

## DISPATCH COMMANDS AND SEE RESULTS IN DASHBOARD

Send scripts to any networked PC on any vessel and see results in the web dashboard.

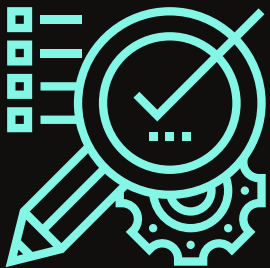

## Visual Studio Code

### POWERFUL BUILT IN CODE EDITOR

Web Dashboard includes an embedded version Microsoft's VSCode to make writing scripts easier.

### GAIN NINJA LIKE STEALTH

Silently run scripts in the background at any time without interrupting the end user.

### PERFORM THE SAME TASKS YOU DO IN YOUR OFFICE ON THE VESSEL

No limit of what you can do: Manage Active Directory, restart services, install software, reboot machines and perform virus scans.

### BUILD YOUR OWN SCRIPT LIBRARY

Create and manage your own code library. Save scripts so they can be re-used in the future. Share scripts with your team.
