

INTRUSION DETECTION

A9X WATCHDOG INTRUSION DETECTION SOFTWARE

A9X Watchdog is a HIDS (host intrusion detection system) which has been designed and developed by A9X specialist software developers specifically for maritime / offshore and remote applications. A9X Watchdog will provide your IT cybersecurity team with real-time monitoring, alerting and reporting of critical cyber-attacks and intrusions. Unlike other off-the-shelf solutions, A9X Watchdog also offers built-in intrusion detection recorders (customizable) which can be configured for both the common vulnerable targets exploited by hackers, and any other targets that your security team wishes to monitor.

Another smart A9X software only solution (no hardware to deploy or support), A9X Watchdog is data light, easy to install / managed remotely via the A9X Dashboard, and most importantly is fully customizable and won't swamp your IT staff and managers with a multitude of false positives.

A9X Watchdog only alerts who you designate on the A9X Dashboard and reports the real threats!

Features:

- End-to-End hybrid Host Intrusion Detection System (HIDS) allows your cybersecurity team to identify the hackers before they compromise your systems
- Detect malicious attacks against over 15 common services e.g., HTTP, SMB, SNMP, TFTP, SIP, VNC, NTP, FTP, etc.
- Detect hacking attempts when they happen, know the location where attacks are coming from
- Detect changes to critical system files (who did what and when)
- Help keep existing Corporate and Crew networks safe from attack by detecting early intrusion
- A9X Watchdog is an integrated part of A9X’s Defense in Depth approach to cybersecurity

A9X WATCHDOG SOFTWARE – SMART INTRUSION DETECTION AGAINST CYBER ATTACKS LIKE NO OTHER...

KEY BENEFITS

WHO IS A9X CYBER SECURITY

A9X Cyber Security has a vision of “being the preferred vendor for cyber security management at remote locations ”

Mission of A9X Cyber Security - providing Cyber Detective Security, and specialized knowledge for remote locations

- Cost effective
- Yielding results
- Being creative
- Effective communication
- Respecting our shareholders, employees, customers, vendors and the general public
